Hanks HM² Triad e-Gun

Thermionics introduces Triad pocket 6 and 10 kW HM² e-Guns. The HM² Triad series provides unique modular magnetic design producing a more efficient electron beam. The Hyper-Unimelt 200 Hz sweep eliminates tunneling and source material eruptions. Plug-in emitter assemblies and sweep coil assemblies make the sources easier to service. Easy filament alignment, more efficient electron collimation, minimal filament distortion and elimination of electron tails. Perfect for co-evaporation!
